Hardware Key Option – License Activation Instructions

Thank you for your purchase! This hardware key allows your Software Toolbox software license to roam conveniently between multiple machines. We are confident you will find this hardware key easy to install and use.

Getting Started

Please follow the instructions below to initialize your license information on the hardware key.

1. Please make sure the correct version of SLIK DA is installed
2. Open up the SLIK DA Registration Wizard
3. Select the Activate License option and click Next
4. Select your registration preference and register your SLIK DA license
5. Close out of the Registration Wizard
6. Plug the hardware key into the appropriate port on the computer
7. Open the SLIK DA Registration Wizard again and select List Hardware Key Licenses
8. Verify that the Hardware Key is visible
9. Hit the Back button and select the Activate License option
10. Select the Assisted Activation option and click Next
11. Copy down the Computer ID and your serial number and contact Software Toolbox with this information
12. Software Toolbox will provide you with a System Authorization Code
13. Enter the Serial number and the System Authorization Code into the Registration Wizard
14. Make sure the Hardware Key is inserted into the appropriate port and select Next
15. The Registration Wizard will automatically detect the presence of the Hardware Key and will initialize the license information on the hardware key

Process Complete!

The hardware key now contains the permanent activation code. Simply plug your hardware key into the desired machine, and you are ready to go! When you want to move your software license to another development machine, simply unplug your hardware key and move it to the desired computer.
