Introduction

This document will show customers how to register an OmniServer serial number. Please follow each step in this guide. To register a license you will use our registration website:

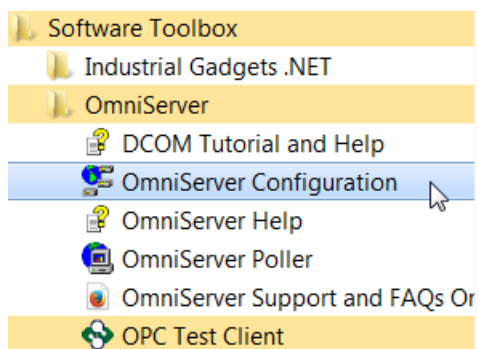

<http://registration.softwaretoolbox.com>.

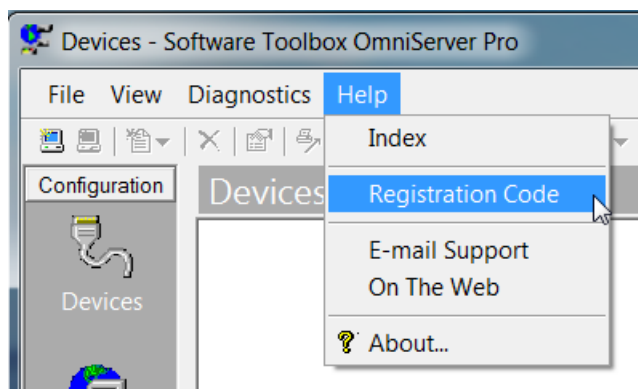

Computer ID information

To access the Computer ID information needed to register the OmniServer serial number follow the steps below.

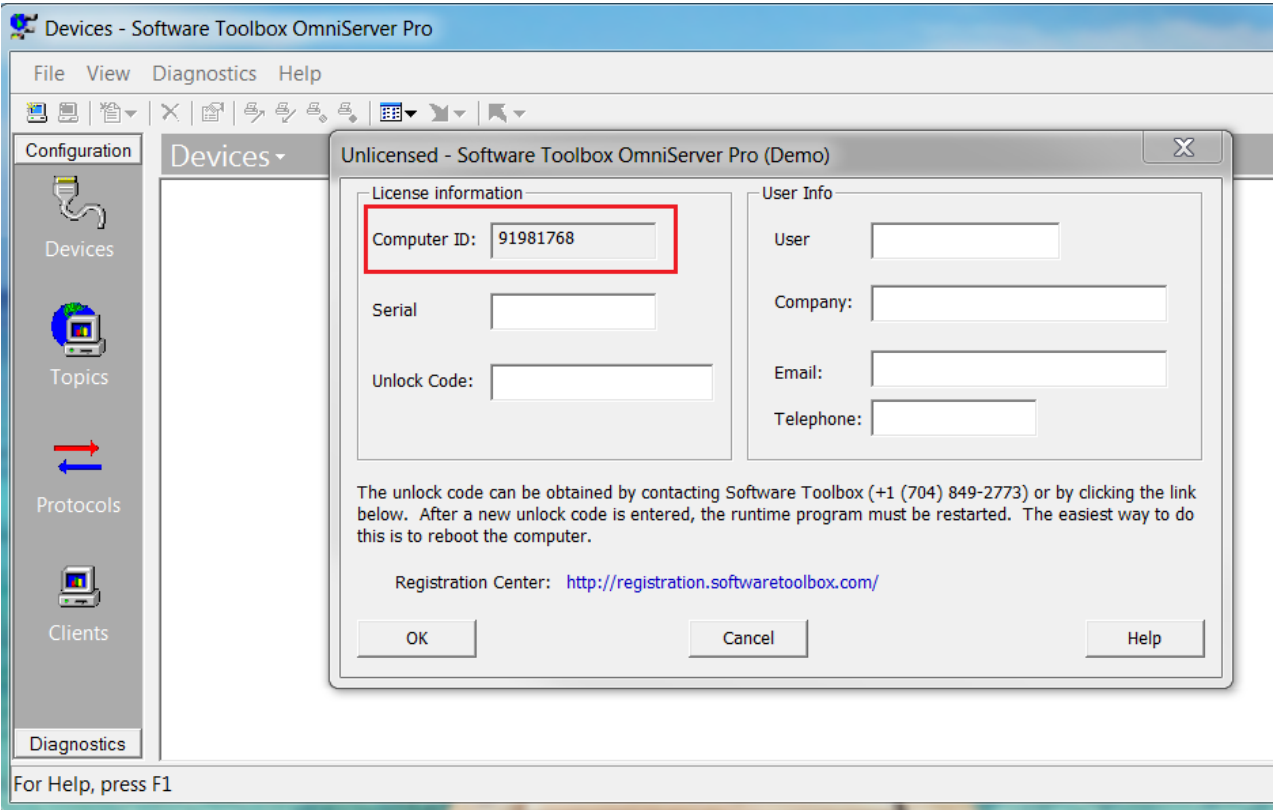

- Go to the Start Menu
- Click on All Programs
- Click on Software Toolbox
- Click the OmniServer folder
- Click on OmniServer Configuration

Once the Configuration window opens click on Help and Registration Code.

The License menu of OmniServer will open and you will find your Computer ID. This ID is different on each computer so you will need this unique code for each OmniServer serial number that you register. This window will also let you know if OmniServer is currently licensed or in Demo (as shown below).

Record this Computer ID as this will be needed for the online registration steps.

Online Registration Process

The first step is to open a Web browser and go to <http://registration.softwaretoolbox.com/> and click on either of the Register Now options.

****If you do not have access to a web browser please contact our support team with your Serial number and Computer ID.**

Please Select OMNIServer from the list and click Next.

Select "Myself" or "Someone Else" when asked who you're registering this serial number for. You will then need to fill out the appropriate information and click Next.

Step 2 of the registration process will require the Serial Number and Computer ID.

****Please note, the OmniServer version MUST match the serial number. The first 3 numbers in the serial number match the last 3 numbers of the Version number. For example: Serial Number: 109xxxxx must have OmniServer Standard (Part Number: 41242109) selected.**

Step 2 of 4

The following information is required for an **OMNIServer** unlock code::

Serial Number:	<input type="text" value="109xxxx"/> (xxxxxxxx)
Computer Id:	<input type="text" value="91981768"/> (xxxxxxxxxx)
OMNIServer Version:	<div><div>OMNIServer Standard (Part Number: 41242109)</div><div>OMNIServer Standard (Part Number: 41242109)</div><div>OMNIServer Pro (Part Number: 41242110)</div><div>OMNIWedge (Part Number: 41242111)</div></div>

[Back](#)[Next](#)

Once all the information has been entered click Next.

Step 3 will require notes to be entered. These notes help us determine where the license was located if we need to search for it. Notes such as "Computer 1 in Plant B" or "Well Drilling project for pump 14" are great examples. When finished, click Next.

Finally, confirm all information is correct and click Next.

Your Unlock/Password will appear if the registration was successful. If there was a problem, it will automatically contact our support team and we will contact you shortly.

Finalizing the Registration

The last step in the registration process is to enter in the Unlock Code in the OmniServer license window. Please return to the OmniServer configuration window. If you closed down the License window, please reopen it by clicking Help | Registration Code. Make sure the Serial and Unlock Code information is entered and click OK at the bottom. OmniServer will notify you if the registration was successful. You will need to close down OmniServer before the license information is shown.

To check that OmniServer is licensed you can go back into the License Window and it should say “Fully licensed” with no (Demo) in the title.

Conclusion

If after reading this document, there are any further questions on registering OmniServer, or any assistance is required, our experienced staff is more than happy to help. We can easily be reached by:
